

DEDICATED INTERNET ACCESS

Secure, High-Performance Connectivity for Ontario's Mission-Critical Operations

For over 20 years, Acronym Solutions has provided the reliable, robust Dedicated Internet Access (DIA) that Ontario's essential services depend on. Our high-performance connectivity offers the speed, stability, and scalability your business demands.

A dedicated, high-performance connection designed for organizations that can't afford downtime, inconsistency, or risk.

WHY ACRONYM DIA?

Performance without Compromise

Experience symmetrical speeds from **100 Mbps up to 100 Gbps**. Our low-latency network is built for demanding workloads, ensuring fast and secure data transfers every time.

Resilience by Design

We provide a Layer 3 protected network featuring a **self-healing ring topology**. With over 9,800 km of fibre-optic lines and 80+ Points of Presence (PoPs), we offer the path diversity and redundancy that standard carriers often cannot provide.

Security You Can Scale

Protect your network from the core to the edge. Our DIA includes optional **DDoS Shield** protection to quickly identify and block threats before they reach your internal systems.

Expert Support 24/7

We act as an extension of your team. Our 24/7/365 Network Operations Centre (NOC) handles the monitoring and troubleshooting, so your staff can focus on their core priorities.

A NETWORK BUILT FOR YOUR CHALLENGES

Whether you are managing a complex regional network, navigating strict data security requirements, or simply need a connection that stays stable during peak hours, Acronym DIA is built to handle the load.

We provide a reliable, Ontario-based network that keeps your business connected.

Network coverage	Ontario-wide with 80+ Points of Presence
Autonomous System Number (ASN)	19752
Port types	Ethernet: 100 Mbps, 1 Gbps, 10 Gbps and 100 Gbps
Upstream providers	Multi-homing bandwidth via Tier 1 operators
Peering Exchanges	TorIX, QIX, and NYIIX
IP Support	IPv4 and IPv6
Service Level Agreement	Credit-backed Performance SLA
Customer Support	24x7x365
Billing Model	Flat rate
Security features	DDoS Shield*
Ad Hoc Reports	Shared upon request

*At an additional charge
